New Marne Offensive

A great Allied offensive commenced on Thursday, taking the Germans completely by surprise. Several thousand prisoners have been captured and a large number of guns. A gain of from two to four miles on a 25 mile front was reported last night by the French and American troops, who were still advancing. The enemy may have to withdraw his troops from the Marne front or risk being caught where they are.

Christmas Puddings for Canadian Boys

The Canadian War Contingent Association proposes to put up 100,000 lbs of Christmas Pudding for the men in the trenches, to be delivered in London in time for the pudding to be distributed for Christmas. The Hamilton Fruit Kitchen of the Canadian Red Cross Society has placed its plant and staff at the disposal of the Association for this purpose, all expenses being met by the C.W.C.S.

The amount named will ensure each Canadian soldier overseas being served a generous portion of delicious pudding on Christmas Day.

The puddings will be put up in five pound tins and for each \$50.00 received, fifty puddings will be dispatched overseas, each in double packed with compliments, but the association cannot undertake to forward any puddings specially addressed to units or individuals.

Subscriptions for this fund should be sent to the provincial secretary, C.W.C.S., Box Theatre Building, Calgary. The subscription list is only open for a short time, as all arrangements for making and dispatching the puddings must be completed almost immediately.

Will you not help to remind our Canadian soldiers in the field of the friends at home at Christmas time, by sending in your contribution as quickly as possible?

Not the Driest Year

If it is any consolation at all this year is not, so far, "the driest ever." Calgary has had up to date this year the greatest amount of rain in the history of rain more than it was favored with in 1910, in the same period of time. This year we have had 3.78 inches against 3.10 in 1910. The dry months in 1910 were April, May, June and July and then August came along with 1.97 inches, so it is not surprising after 1910 we may yet look for enough rain to remind us of what it is like.

The dry Year of 1914, remembered with aversion through the wheat belt, had a total rainfall at Calgary of 17.71 inches, quite a considerable amount of rain.

This all "happened" after August and made the west safe for the bumper crop of '15, so although hope has been annihilated so far as this year's crop is concerned Lloyd's possibly might consider next year's crop a good risk.

The precipitation of rain at or near Calgary since 1909 runs as follows:

Year	Inches
1909	10.41
1910	8.95
1911	10.72
1912	10.24
1913	11.47
1914	17.71
1915	18.24
1916	18.91
1917	14.28

January has given us 0.28 inches; February, 0.60; March, 0.44; April, 0.24; May, 1.57; June, 0.26, and July, 0.29, a total of 3.78 inches.

AUSTRIAN LEADER QUITS

General Shake up in the Austrian Army Staff

Amsterdam, July 17.—Emperor Charles, says a Vienna dispatch, has granted the request of Field Marshal Conrad von Hotzendorf, former Austrian commander in chief and lately in command on the Italian mountain front, that he be relieved of his command. Gen. Archduke Joseph has been appointed commander of an army group and Cavalry General Prince Alois Schoenberg-Hartenstein, commander of an army.

Live Stock to be Transported Without Charge

Arrangements for finding winter feed for cattle in the districts of Alberta where the crop has been a failure, are now rounding into shape.

The Hon. Duncan Marshall, provincial minister of agriculture, took the matter in hand for the province of Alberta and has had men from his department out locating hay and pasture land for over a week. Their reports are not coming in and that end of the business will be in shape in a few days. In the meantime Mr. Marshall wired the traffic managers of all the railways at Winnipeg, asking them to give special consideration to the matter of freight rates.

Mr. J. D. McGregor, food controller for western Canada, was in Edmonton last week attending the fair, and Mr. Marshall had a conference with him and asked him on his return to Winnipeg to interview Mr. Crear and discuss the whole situation with him and make representations for the Alberta department.

On Saturday evening Mr. Marshall received the following from Mr. McGregor from Winnipeg:

"I attended meeting of railways on Saturday, which agreed on half rate from all points in the three provinces of Ontario, Quebec and Lunenburg, south of line on C.P.E.R., running from Red Deer to Lacombe, to Kerrobert, to Wilkie, to Saskatoon, and to C.P.R. east of Saskatoon to eastern boundary about 100 miles west of Winnipeg. Cattle and sheep will be moved to the north at half rate of five cents per hundred pounds on cattle and 10 cents per 100 pounds on sheep up to Nov. 15, 1918, shipment returning half rate in reverse direction prior to Oct. 1, 1918, provided arranged by original owner to original point of shipment. Hay and straw carloads at half rate in reverse direction from movement of cattle and sheeps above described up to May 1, 1919. All rates subject to certificate signed by the deputy minister of the province in which shipment is made."

At the same time the Hon. Mr. Crear announced that the Dominion department of agriculture would supplement the reduction made by the railway companies in freight rates by the Dominion department paying an equivalent. As the railways have made a reduction of 50 per cent, the Dominion department will now pay the other part of the freight rate, which will mean that live stock and feed will be transported free of charge to the province where agriculture is the province.

KANSAS WHEAT HARVESTED

Washington, July 17.—The harvest of the great Kansas wheat crop is practically harvested, the department of agriculture was so informed by the war board of commerce. The board calls the accomplishment "phenomenal" and attributes it to the work of the federal employment service supplying labor to the central wheat belt.

CROPS IN QUEBEC

Quebec, July 17.—Farmers in Quebec have cultivated more grain than ever, but the fruit crop will be a failure. Such is the conclusion of a report filed today with the department of agriculture of the province by F. J. Savin, secretary to the minister of agriculture.

Winnipeg, July 17.—Given a heavy rain or two within the next few weeks Manitoba is assured of a fairly good crop, according to the second official report published today by the Manitoba department of agriculture. During the past two weeks, the report states, showers in many places have materially improved conditions. At a few places practically no rain has fallen, but the standing grain, now in the hot shade, is withstanding the drought better than might be expected.

In many places the wheat has already started to head out and from practically every district indications that the crop is heavy in the hot shade are forthcoming. Lack of rain in some districts is creating the danger of maturity being reached before the maximum growth has been attained.

GERMANS LOST 100,000 MEN

London, July 17.—Casualties sustained by the German troops in the offensive up to the present are estimated to number 100,000, according to news received in London today from the battlefront in France.

Two daughters of Rev. J. Reid, of Vancouver, are spending their summer holidays in Starvo.

Mrs. Brownfield fell and broke her arm last Friday.

Mr. T. Childs returned last week from his visit to California.

Mr. and Mrs. Crossman and family returned from Didsbury last week.

What The Food Board is Doing

The Canada Food Board is under the Minister of Agriculture and is composed of three members, H. B. Thompson, Chairman, Honorable C. A. Douglas, Director of Production and J. D. McGregor, Director of Farm Labor.

It aims to control the production and the distribution of foodstuffs, using the established channels of production and trade, so that Canadians need not want and Great Britain and the Allies may be fed.

It urges greater production in order that Canada's exportable surplus of foodstuffs may be greater. Without food the Allies would starve. This menace of starvation in Europe must be guarded off, if the allied forces are to be effective, for every civilian here famine more than he fears the Germans. Napoleon taught him that. It's in his blood.

Beef, pork and wheat are vital foods in the warring countries. To increase their production Canadians must produce more, conserve what they have by substituting other foods for them and by reducing the quantities consumed. The Canada Food Board by its publicity, propaganda and regulations, which have the force of law, stimulates production working in conjunction with provincial committees, practices the substitution of fish for beef and pork, corn meal and oatmeal for wheat and tinsels that every citizen shall be a conscientious food controller.

The embargo and the licensing system are the two weapons that make possible food control in Canada. No food can enter or go out of Canada without a permit. No one can buy or sell foodstuffs without a license. Retail establishments, involving licenses, number 80,000; wholesale establishments, 20,500. 1,500 licenses are issued daily. Permits to exporters and importers number between 1,250 and 1,800 a month. A revenue accrues from the licensing system which goes to the Receiver-General, though the Canada Food Board is given credit for it. By the end of 1918, after two years operation, the Canada Food Board will have cost the taxpayers not a single cent. It is self contained and self-sustaining.

By July 1 Canada will have shipped 40 per cent. more wheat to the Allies than the average of three years before the war. The increased shipments to date are: Pork, 122,000,000 pounds, beef, 74,000,000 lbs., wheat and flour, 85,000,000 bushels, eggs, 15,000,000 bushels, eggs, 15,000,000 dozen. Shipments of pork from the United States and Canada during March, 1918, were twice what they were in March, 1915, and three times what they were in March, 1912. The test of the Canada Food Board is that it gets its foodstuffs shipped overseas. When the last sack of flour of the 1917 crop is shipped the next boat to leave will carry the first sack of 1918 crop. Western Canada has increased its grain acreage 2,600,000 acres and made a larger provision for the production of food animals especially hogs. By June 15, 20,000 bushels of corn will be utilized daily by Canadian flour mills affording ample substitution for wheat flour.

The Canada Food Board has effected a revolution in the fish-exporting habits of Canadians. The consumption of fish has increased 100 per cent in the past twelve months. The retail fish stores have grown from 960 to 1,500 in less than a year. The economic diet of native fish bids fair to be permanent.

Canadian food control cannot rise higher than the voluntary self-sacrificing and denying power of the people will permit. Compulsory rationing is foreign to the temper of Canadians and so far has not been found necessary. Every province is now drafting voluntary rationing plans to conform to local conditions.

The paramount task of the Canada Food Board is to feed the Allies. Nothing else matters.

We are making Money! Do You Want to Make Money?

You Can Make It With Us

In the past 90 days we have completed three producing oil wells in Paola, Kansas, each having an estimated production of forty barrels per day. These wells are now being connected with the Prairie Pipe Line, and within a few days the profits from the wells will be rolling into our treasury at the rate of \$2.50 per barrel.

We have fourteen other drilling cites on this forty acre lease, where our first wells are situated. Fourteen more producing wells is the inevitable result.

In addition to this first forty in Paola, we have 134 acres just south of the original holdings which is considered a "sure pop", sixty acres in the great Garnett fields of Kansas, completely surrounded by producing wells, and hundreds of acres in seven wonderful Wyoming fields. Hundreds of wells are possible.

This is not a speculation—we have the goods. We pay dividends now and will be able to pay more as soon as we can develop our property.

Claresholm Local News

J. W. Hallett has been spending his time recently doing his summer-fallowing with a Moline tractor.

Mrs. J. W. Hallett and son Willie, leave on Saturday for Gull Lake, where they will stay until the end of August.

You need two days off to attend the Claresholm Exhibition, July 30 and 31.

Crop prospects have not improved during the past week, some summer-fallow crops are standing the dry weather fairly well. Practically all the fall and spring plowed crops are a complete failure and many of the farmers are contemplating cutting the land again in order to prepare for the next year. The crops in the town of town are poorer than those close in and west. There is little chance now of more than a very small crop.

Rev. J. W. Kidd, M. A., has received and accepted a call to the Okotoks Presbyterian church. Mr. and Mrs. Kidd have made many friends in Claresholm, both inside and outside the Presbyterian church, who will regret very much to hear of this change.

Miss Florence Boers, of Mount Royal College, Calgary, is visiting at the Methodist Parsonage with her mother, Mrs. Louisa.

Mr. Thor Brown and his bride returned from the east last Saturday.

For Sale, Five or six dry cows. Apply Mrs. Tupper, Claresholm. 21-1

Mr. and Mrs. Brereton and Mr. and Mrs. Rice, of Claresholm, were visitors to Alderside on Sunday.

"Intolerance" to-night, Friday, at the Rex. Don't miss it.

The Sacrament of the Lords Supper will be administered at the morning service in the Methodist church next Sunday. The pastor would like to see many of the members to be present as possible.

The regular meeting of the Quarterly Official Board, of the Methodist church will be held next Tuesday evening at 7 o'clock. A large attendance is desired.

Mr. Thos Guy received word this week that his two brothers, Theodore and Albert Weiss were on the troop ship which was wrecked on the Atlantic coast. They left Winnipeg with a mounted regiment. Mr. Weiss writes that they lost all their belongings. After being in the life boats for five hours they were picked up by passing vessels and landed at an Atlantic coast. The brothers knew nothing of one another's fate for five days. The vessel struck a rock during a heavy fog.

Court News

On July 9th Carl Wellbeck charged Rose Thomas with breaking and entering the property of Wellbeck. Accused pleaded not guilty. Stated he thought the coat was his own. Fined \$20 and costs.

On July 17th Corp. Vice arrested Charles Thompson, a former east of Gratum, who was in illegal possession of liquor. He pleaded guilty before N. Holmes Magistrate. Fined \$50 and costs.

CorrespondenceThe Editor, Review-Advertiser, Claresholm.
Dear Sir:—

What is urgently needed in this district is a competent police magistrate. There should be some person who knows something of law, and is strong enough to know his own mind, whose business it would be to bring cases between High River and Macleod and who would be able to pay for his services.

Recent decisions given by the local magistrate are sufficient evidence to prove the need of such an officer. Instances could be cited, but the people of this town are already well aware of a condition which is already deplorable.

Yours sincerely,
"Citizen"**MORE FRIGHTFULNESS**

Amsterdam, July 17.—The Telegram publishes a statement which attributes a large number of the German submarine commanders have been ordered as far as possible to make prisoners of the crews of enemy merchantmen. The Telegram further states that many of these crews, The German command says, intend to treat them not as civilians, but as prisoners of war and to subject them to the most severe regime of ordinary prisoners.

Mr. and Mrs. E. V. Chambers and son Gordon, left on Sunday for Edmonton and district to spend their holiday. They motored as far as Calgary.

Pte. Carl Edlund is home from Barrow camp for six days.

An unusual shortage of gasoline has occurred throughout the province during the past week. Thirty five towns are reported as being closed out of gasoline. The demand for war purposes has undoubtedly caused the shortage.

Mr. Irwin, of Nanton has taken charge of the Bawlf Grain Company elevator, and has moved Mrs. Brown's house opposite the Presbyterian church.

Mrs. L. McKinney, M. L. A., is now visiting various parts of North Dakota.

Sheldon Fraser is at Bochemer to undergo a slight operation on his nose. He is progressing well according to reports received.

The Financial News reports the loss on the Noble farm this year, owing to the dry weather, as being half a million dollars.

Arrangements have been made for union services between the Methodist and Presbyterian churches. Rev. Locke will be away for his holidays during August and Mr. Kidd will be absent during September.

Pte. Dixon, son of G. A. Dixon, has been visiting at his home. He is a returned veteran.

Mr. Dixon and family, of the Alberta Pacific Grain Co., have moved from Lethbridge and will reside on the east side of the track in the house recently occupied by Neils Thompson.

Neils Thompson and family now occupy the house recently purchased by the Independent Grain Co., from Jack Reynolds.

House to rent and large tent for sale. Apply Mrs. Woloski, Starely.

LOST, 2 yearling red heifers. Branded Z U on right rib. \$10.00 reward. — W. L. Long, Phone No. 8-1020.

Wilbur Annable, with a score of 211, has been awarded the marksmanship medal and diploma offered by the Winchester Junior Rifle Corps, a recently formed National Organization to promote shooting among the boys and girls in America.

Marksmanship and sharpshooter medals are offered by the Winchester Jr. Rifle Corps to any boy or girl not over 18 years of age. A score of 10 out of a possible 25 on each of ten targets wins the marksmanship medal, and a score of 24 out of a possible 25 on each of 10 targets wins the sharpshooter medal. The target must be shot at a fifty foot range.

Mrs. Geo. Simpson is spending a few weeks with her parents at Innis, Allen, Ont.

Principal Stevens and Prof. Quilty left on Tuesday for Cardston to attend the sheep convention being held there.

Ariel Brothers have had relatives visiting them from Edmonton for several days.

John Carlson returned home last Wednesday after spending three weeks in Victoria and other coast cities.

Pte. Geo. Booth and Thos. Cobly returned on Tuesday morning from Buffalo.

Miss Myrtle Fraser, of Nanton, was visiting her home last Sunday.

Miss Ruth Whitte, of Winnipeg, is visiting her grandparents, Mr. and Mrs. W. Moffat.

Robt. Malcolm, of the Bank of Commerce, is spending his holidays at his home in Medicine Hat.

Capt. Robt. Larkins sends word that he was taken ill on the train and taken to the Toronto hospital. He expects to be able in a short time to resume his journey to his home in New York.

Those who missed seeing Forbes Robertson in "The Passing of the Third Floor Back" at the Rex, will be sorry to hear that Forbes Robertson has shown that the moving picture can be used to teach great moral truths. His impersonation of non-resistance was successful, and the lessons so vividly presented cannot fail to have their effect on those who were fortunate enough to be present.

Labor in Growing Wheat

It requires 12 1/2 bushels of human labor, and 30 hours of horse labor to produce an acre of wheat in Minnesota. These figures were secured in an investigation carried out during the years 1909-12 when the Minnesota Experiment Station, with the Minnesota Cooper, then with the Minnesota Experiment Station, now director of the North Dakota Experiment Station.

If the yield was 12 1/2 bushels per acre each bushel would require one hour of human labor, and 30 hours of horse labor, while if the yield were 24 1/2 bushels, only half as much labor would be required per bushel.

Simple and Sure—Dr. Thomas' Simple Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so simple and unmistakable that they are easily understood by young or old.

Taking No Chances

"Lemnie eat those umbrellas held before you let them in!" Mrs. Binkley hastily interposed as Mrs. Binkley moved toward the door in response to the bell.

"Do you think our guests will be so stupid as to let them in?" Mrs. Binkley demanded contemptuously.

"Maybe not—but they might recognize them!" Vancouver Province.

Controlling Fires On Settlers' Clearings

The Permitt System of Regulating Settlers' Clearings

The permit system of regulating settlers' clearings is now in effect throughout nearly all the forest regions of Canada. Last year the system was brought into force with the greatest success in the province of Saskatchewan. This year, the new Fire Act of New Brunswick, which plan effective through the province, in Nova Scotia, Quebec, and British Columbia, the system has been in effect for years. Although it is now the only forest province without it.

Wherever the setting out of settlers' clearing fires has been regulated under the permit system, with an adequate staff for its enforcement, it has worked wonders in reducing the forest fires, which they set back to agricultural development.

The disposal of logging slash, a problem closely related to that of slash resulting from settler clearing operations. In various parts of Canada, slash has been a serious problem in the disposal of logging slash, which is receiving increased attention due to the rapidly increasing volume of the disposal of timber and the realization that our forest resources are being rapidly depleted.

MAKES A CORN SHRIVEL SO IT LIFTS OUT

Just a drop or two of Putnam's Extract will make a corn shrivel so it lifts out. It is a sure cure for corns, blisters, and other skin troubles. It is a sure cure for corns, blisters, and other skin troubles. It is a sure cure for corns, blisters, and other skin troubles.

Having a Whack at War

Canadian Had Charge of Two Big Guns and Knew How to Use Them

The following article has been received from Roland Hill. Up and down this hard-fighting front you find Canadians in unexpected places. I met a major, seconded to one of the best Canadian regiments, mounted on railway trucks, hammering away at a German machine gun. He had been all through the battle and both of his legs were still in fine shape. The major came over with a Winnipeg battalion. He was engaged in a military administration in Manitoba, and knew nothing about gunnery, but he was not going back without having "a whack at the war."

Although he knew nothing about gunnery, he did know a lot about mathematics, and when he was sent to a northern English munition works to see his guns in the making, he so impressed the imperial authorities that he was given an immediate commission. Since then he has been educating the Huns with ranges varying up to twenty miles, cross-roads and railway stations being his targets.

During the first day of the Huns offensive he was at Rottel, and kept one eye on the railway track behind him and the other on his pet, a wire-wire, thin little dog, which he carried right up to the moment the Huns started to advance. In the eighteen-pounders were alongside him. "Then I thought it was time to get out of the line," he said, "and I went to the rear. I got to a strong lair line, and here we are again."

The Way to Success

"The secret of success," the stamp said, "is sticking to it."

"Never lose your head," said the "keep and share."

"Brought up to date," said the calculator.

"Aspire to greater things," said the salesman.

"Don't knock it," said the old-fashioned.

"Do a driving business," said the hammer.

"And the barrel added:

"Make light of everything," said the observer.

"But always keep cool," said the Minard's Liniment Cures Diphtheria.

Protect the child from the ravages of diphtheria by using Minard's Liniment.

Western Extremist. It is a standard of civility in our time.

enhanced its reputation.

An Opinion For Ireland

Only One View Prevails as to the Cause of the Irish Situation

If, as is indicated by despatches from Dublin, all Ireland awaits the opinion of the British government concerning political conditions in that country, we may be given thoughtful consideration.

There is full recognition here of every operation and every blunder of the British government for generations past in dealing with the Irish, but, aside from a small and venomous group of agitators, no one here is prepared to plead in justification of resistance.

What valiant Irishmen all over the world are doing to support the cause of the Irish people is a sufficient answer on this point to every opinion of the British government in London and many cases remain in the hands of the British government.

John Dillon puts the case plainly in only one of its aspects when he says that the Irish people are to the United States "to support the one party in the Irish struggle which is the cause of liberty in other lands."

Russia's Magnificent Opportunity

Allies Cannot Dismiss Themself in the Future of Russia

The progress of German in the East, the treaties she has forced upon Russia and upon the vassal states she has carved out of Russia and the interpretation she has placed upon these "scraps of paper" as her plans develop, confirm President Wilson's warnings and make them more impressive. The allies cannot dismiss themselves in the future of Russia, even if they would. The independence of so great a people as hers is a European interest, and even a world interest, as the allies perceive. They are passing through heavy trials, and the prospect before them seems dark, yet the trials are not heavier or the prospect darker than those of other great nations which have emerged and prospered.

A NERVOUS BREAKDOWN

When the Blood Is Out of Order the Nerves Are in a Starved Condition

The nerve system is the governing organ of the whole body. It governs the heart, lungs, digestion and brain; so it is not surprising that when the nerve system is starved, the body suffers. The first signs of a nervous breakdown are weakness, irritability and restlessness, in which the body is unable to express its own vitality. The more the nerve system is starved, the more the body suffers. The first signs of a nervous breakdown are weakness, irritability and restlessness, in which the body is unable to express its own vitality.

The French Were Ready

With the French Forces in France, July 17.—General Gouraud, the hero of the Dardanelles, was the French commander who hurried the advance of the German crown prince in the Champagne. It was he who, to the east of Reims, in one day, brought the host of Germans to a standstill. This was done with only comparatively insignificant losses among his own men.

About twenty army divisions have been identified in the first line of this sector of the front alone. By the end of the first day of fighting, half of these divisions had been badly mauled. The precautions the French had taken before the Toul offensive began were such that the Germans were unable to capture a single prisoner in the Champagne during the several days preceding the attack. The Germans were thus deprived of the possibility of obtaining information regarding the French plan.

When the German artillery preparation started on the night of the 14th the flashes from thousands of guns were so vivid that they lighted up the streets of Chalons, nearly twenty

miles from the front. The French replied with an equally powerful fire, and everything for miles trembled until dawn, when the German infantry came over. The advancing waves were of great density, giving the hundreds of French 75's a point blank target.

At the same time small centers of resistance composed of French advanced posts opened fire with machine guns, which did terrible execution. These isolated detachments held up enemy masses for several hours, giving ample time for their comrades regarding the line of resistance to organize and to bring into play all their means of defence.

Then they retired slowly, at times being compelled to fight strong bodies of the enemy, who had succeeded in passing their positions. Lieutenant Transhard, with 25 men, was caught between the French and German barages and remained fighting half the day. He then cut his way through the enemy's lines at the point of the bayonet and received the Legion of Honor on the field.

The perfect execution of Gen. Gouraud's defence plans prevented the enemy from making a breach at any point on this sector, although during 24 hours the German crown prince

sent three incessantly renewed waves of his host, across forward to the determination to get through to Chalons.

Gen. Berthelot Also Paris, July 17.—After being prohibited to print the information last night that Gen. Gouraud, of Dardanelles fame, was commanding the French sector between Reims and Metz, the Paris newspapers today are allowed to reveal the fact that Gen. Berthelot, who headed the French military mission to Romania, is now commanding the Franco-Italian army in the sector between the Marne and Reims.

British Headquarters in France July 17.—For once the German weather experts have been at fault. Bad weather has doubtless necessitated the comparative failure of the offensive, otherwise there might have been something suspicious in the little progress made to the east of Reims. Even conceding everything to the gallantry of the French and the foresight of their leaders, the progress made is puzzling, except on the ground that no further progress was intended, the attack being a mere holding on to attract reserves from other areas. Even on the Marne, the enemy's success is nothing like what it ought to have been considering that this is probably the final bid for victory. What does the enemy's apparent economy of his fighting forces portend, unless the adventure is preliminary to a more important attempt elsewhere, which, if attempted and foiled, may well prove decisive.

HEAVY RAIN IN FRANCE

Rain and Hail Continued During the Entire Night

British Headquarters in France July 17.—A phenomenal storm raged over northern France Monday night, accompanied by incessant thunder. Sixty flashes of lightning were counted in one minute. The fall of rain and hail was most heavy and continued throughout the night. If as it must likely, the storm extends as far as the Champagne region, it must affect in marked manner the progress of the Germans, as the roads, matted with chalk, were inches deep with the rain, which the downpour would convert into a slippery slime. Today the weather was hot and thundery.

Baseball

At last the Clareholm baseball team have parted Co. with the Jinks. They visited Granum last Friday evening and took the team of that place into camp by a score of 5 to 3. It was a good game all the way through. Stelbins in the box for the Locals was relieved in the fifth by J. Co. a baseball the Granumites out to a finish. Clarys catcher for Clareholm played a great game behind the bat and his consistent game throughout went a long way in beginning home the bacon. There was some very fancy footwork done especially by the Granum fans. The routing of the Editor of the Granum News was a feature as on several occasions it came very near being necessary to have the Umpire remove him off the lines, and the only time that he was not conspicuous was after the game.

The Granum team is composed of locally born players and are entering a team in the Tournament to be held at Clareholm on July 30th.

The baseball game on Thursday between Clareholm and Barons scored 8 to 4 in favor of Barons.

Make Money With Us in Oil!

WE ARE NOW DRILLING IN WYOMING

Warm Springs, Wyoming—Already one of the big producing fields of the State. Twelve wells have been completed and fortunate stockholders are drawing big dividends every month in the year. This "shallow" field and the drilling cost is at a minimum. Through a peculiar turn of fortune the Van Duzen Co. was able to secure a valuable lease on this structure. At least a dozen companies are now drilling towards the oil producing sands in the Warm Springs dome and we do not expect to lose much time in starting our operations. Remember this is a producing field.

Sundance-Upton Fields, Wyoming—We were in this field just before the boom started and have 6,080 acres under lease on the very apex of the structure. This dome bids fair to be one of the best fields in this State and our large acreage will always make this the big company of this big field. We are drilling in this field.

Salt Creek, Wyoming—This is the most consistent oil producing field in all the world, and although the field is but five years old, it has made more wealthy people than any of the big fields of Wyoming. The wide-awake men who are at the head of this company have secured 320 acres of land less than a half mile from one of the largest gushers in the field. One 500-barrel well in this field at \$1.00 per barrel would mean more than 20 per cent. per annum on the total capitalization of the Van Duzen Oil Co. We have room for 60 wells on our property.

The Crazy Woman's Pocket, Montana—This dome has been recognized by many geologists to be most perfect structure for an oil reservoir in all of America. Two other companies have wells in process of completion on this dome, and it is reported that one of them has already encountered an oil producing sand. The Van Duzen Oil Co. has secured 560 acres of deeded land midway between the two wells now drilling. Our derrick is now in the course of construction. When this is proven it will be the first producing field in Montana. Boom prices will prevail and our stock is sure to go sky-high.

Powder River Junction, Wyoming—We have a one-third locator's interest in three one-quarter sections lying within a quarter of a mile from a well now being drilled by the Mammoth Oil Co. This dome is looked upon as being one of the coming fields of the State. Shallow drilling and its proximity to rail transportation will make this field a big dividend payer.

WE do not believe that most motorists can purchase a more widely useful or satisfactory car than the present Gray-Dort.

The larger improved motor supplies surging power and speed. The swift leap from mere loafing to top speed compares favorably with cars of multiple-cylinders.

The ease with which hills are overcome; the flexibility in traffic; the smooth and quiet flow of power; all mark a motor of unusual merit.

Yet the gasoline consumption is low. Even the low-grade gasoline of to-day. A larger radiator and water system keeps the Gray-Dort motor "on the job" all the time.

The carburetor is of improved type. The crankshaft is heavy and balanced. The fan is bigger and better.

The Gray-Dort motor is the final accomplishment in 4-cylinder construction—the ultimate in flexibility, noiselessness, accessibility and ample power.

As for appearance—we ask you to see the car. See the higher radiator, the double-curve fenders, the khaki-lined top, the wider wind-shield, the Gray-Dort green finish, the Triflex reflectors.

The new Gray-Dort embodies all these improvements with all the good features that won instant success for former models. The 4-cylinder motor is a triumph of smooth, economical speed and power. The chassis is sturdy and quiet. The springs are long. The upholstery is deep. The equipment is absolutely complete from electric starting and lighting to the tools. New lines of beauty have been given this model.

The five-passenger touring car is \$1195; the three-passenger fleur-de-lis roadster is \$1050; the Gray-Dort special, beautifully finished and with extra details of equipment, is \$1225 above the list. All prices are f.o.b. Chatham.

Canada vs. German Losses

During the past four years, according to official German estimates, the fire losses in the public forests have been exceedingly small. Prior to 1914, the total fire destruction on over a million acres of German forests was below one thousand dollars a year. Other German forest areas suffered even less harm.

In Canada, however, the country's commercial strength has been steadily weakened by devastating forest fires that devour each year several million dollars worth of property and many human lives. Most of these forest fires were started by carelessness that borders on criminality. One of the least condemnable causes is the unextinguished camp fire, left by camping parties. In 1917 and 1918 a full dozen of the worst forest fires in the Dominion have been due to camp fires. Ignited cigarettes and matches. No camp fire ought to be built anywhere except on rocks or gravel, and should be entirely extinguished. The careless camper in Canada is doing this year what the Kaiser would gladly pay his bombers and propagandists to accomplish.

At Local Theatres

"The Wine Girl"

A wealthy American tourist, obtaining work in an Italian vineyard for a lark, meets the niece and housekeeper of the owner, Carmel Myers in her new Bluebird picture, "The Wine Girl," to be seen at the Rex theatre Saturday, July 22nd.

A pretty love story is started, replete with obstacles and troubles created by the wealthy American parents and a rival, who is a member of the Italian secret societies.

Carmel Myers is supported by Kenneth Harlan, Rex De Roselli, E. A. Warren and Katherine Kirkwood. Character parts are undoubtedly the forte of Carmel Myers, Bluebird's youngest star, and in "The Wine Girl," she is in her element.

One way of Supplying Fodder in Southern Alberta

In a dry season like the present how to supply the winter feed which in a growing number of live stock kept on the farms becomes a very important question.

On the government demonstration farm there is a very nice field of corn growing east of the C.P.R. track, which promises extra well, compared to other crops seeded on spring or fall plowing. The average yield of this crop on the farm runs from six to nine tons green weight, or two to three tons dry fodder per acre for the three years grown. It looks reasonable if part of the land usually summer-fallowed was planted to corn and ear-hatted, an abundance of palatable fodder would be provided and the land would be in as good condition for wheat to follow as if summer-fallowed. On the Lethbridge experimental farm in 1914 wheat, after summer fallow yielded 16 bus. per acre while wheat after corn produced 22 1/2 bus. per acre.

This crop can be grown reasonably easy. A field to be summer-fallowed will be found suitable. Plow the ground in the spring, not later than May 24th, and harrow sufficiently to make the particles of earth fine, then about twice more.

For seeding: The grain drill can be used by closing up some of the feed hoppers so that the corn will be seeded in rows 36 to 42 inches apart. Set drill so that the kernels of corn will seed about six inches apart in the rows. If the click row style is desired which provides for cleaner cultivation by use of a home marker mark the rows 36 or 42 inches apart across the field both ways and seed at intersection of rows with a hand planter dropping four to six kernels in the hill.

A very good hand planter can be purchased from seed houses usually for two or three dollars I imagine with which a man can plant three acres per day with a little practice. Twenty to thirty of these will seed all the corn.

The ordinary drag harrow should be used once a week, at least until the corn is about six inches high, to kill weeds and make a match to hold soil moisture.

After this a corn cultivator or common one horse cultivator should be employed over the field once a week until too high for horse to pass through the corn.

Cutting should be done before the first killing frost comes which is usually early in September. Usually the grain binder will handle the crop taking one or two rows at a time depend on the height of the plants. If the corn is for ensilage it is put in the silo green, being run through a cutter first. If intended for dry fodder the sheaves should be stacked, 10 to 20 sheaves to a stack and by means of a rope and ring or hook draw the tops tightly together and fasten with a piece of binder twine. Corn put up carefully in this manner should stand and in a district of light snowfall can be handled when wanted throughout the fall and winter.

A BETTER FARM GATE

That costs less than home-made gates

BETTER BECAUSE they always hang plumb and straight. They CAN'T SAG even one quarter of an inch. —we can't twist them out of shape. They are flexible but almost indestructible. —they weigh about one-half as much as ordinary all-wood gates but are stronger than steel, wire, or gas pipe gates. Large stock of these gates on hand and made up. All ready to hang, including hinges. Lock close over and get prices. We will be glad to figure your bill of material on anything you contemplate building. ESTIMATES FREE. GIVE US A CALL.
